

# Dickinson College

## Animal Care Assistant Openings

### UNIQUE ANIMAL EXPERIENCE OPPORTUNITY AVAILABLE FOR BIOLOGY MAJORS:

The vivarium at Dickinson College is seeking individuals that have a desire to work with a wide range of research animals. The vivarium allows for practical hands-on experiences during the academic year. Working in the vivarium will allow students to gain the skills, experiences, and knowledge needed to advance their education and prepare them for future careers.

The animals within the Dickinson College vivarium are regulated by the Institutional Animal Care and Use Committee (IACUC). All that wish to join the animal care team at Dickinson College will be expected to follow strict guidelines and ensure that all animals are treated with the utmost respect.
