

NOW HIRING

Invasive Hornet Program Coordinator

JOB SUMMARY

Join our team to protect South Carolina from invasive pests! We are looking for an Invasive Hornet Program Coordinator to support early detection and rapid response efforts for the Yellow-legged Hornet (YLH). You'll work independently and with Invasive Species Program managers to support Department of Plant Industry invasive species program operations, specifically the Yellow-legged hornet (YLH) response project.

KEY RESPONSIBILITIES

- Reviews and replies to public reports of invasive species
- Assists in managing ArcGIS map data and web applications.
- Supervises student interns
- Recruits workers and serves as a point of contact for part-time YLH surveyors hired through a temp agency
- Organizes YLH survey data, office and field supplies, research samples, and grant reports
- Participates in educational programming and public outreach activities emphasizing regulation through education
- Carry out additional duties as needed
