

NOW HIRING

Invasive Hornet Field Supervisor

JOB SUMMARY

Join our team to protect South Carolina from invasive pests! We are looking for an Invasive Hornet Field Supervisor to lead a team to support early detection and rapid response efforts for the Yellow-legged Hornet (YLH). You'll conduct & coordinate team-based surveys, respond to public reports, and enforce plant pest and honeybee regulations. The role involves a mix of fieldwork, survey coordination, outreach, and regulatory enforcement in various environments including apiaries, farms, forests, and residential areas.

KEY RESPONSIBILITIES

- Conduct & coordinate surveys and field inspections for invasive species
- Provides input on survey scheduling and other response priorities
- Coordinates eradication and containment efforts
- Respond to public reports and educate stakeholders
- Maintain and manage state equipment
- Uses and supervises ArcGIS mobile data collection applications
- Carry out additional duties as needed
